

DELTA CRASH CUSHION

 ByTrafFix Devices

SIMPLE, EFFECTIVE DESIGN

The Delta Crash Cushion consists of a series of steel three-beam fender panels supported by steel diaphragms. It attenuates energy evenly for all vehicle types with shear bolts tearing through cut-outs of various sizes and shapes. Quick and easy installation reduces exposure to traffic. Multi-directional object marker comes in Chevron, Left or Right angles, and can be quickly changed in the field.

Performs in all temperatures and climates and is a low cost MASH TL-3 non-gating re-directive crash cushion

MASH TESTED AND APPROVED
